Reach	81 ft/24,8 m
Attachment	Orange Peel Grab 0.9 yd <sup>3</sup> /0,7 m <sup>3</sup>
Power Source	150-hp/110 kW electric motor

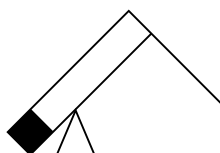

Phillip Services was looking for a way to increase productivity, reliably feed a scrap bailer and lower their operating costs. Several material handling cranes were reviewed, but when the decision was taken, the E-Crane® was selected.

Installed in 1989, the Model 4248 E-Crane® stands on a freestanding pedestal, has 81 feet of outreach and handles 6 UStons in Duty Cycle Operation. **The crane has over 24,000 hours of operation in the "tough environment" of scrap handling.** The crane's principal functions are to feed a bailer, stockpile and sort scrap and load out bails.

According to Joe Giacoboni, the Maintenance Supervisor, **"The E-Crane® is the most reliable piece of equipment we have ever owned, this is a super crane."** The original swing bearing / bull gear is in place still giving great service. Satinder (Sat) Vig, the General Manager recently stated: **"You (E-Crane®) are the best!"**
