QUILIBRIUM

E-Crane International
Buitengewone producten door heel gewone mensen

"The excellent reliability and performance of the E-Crane™ has helped us to reduce cost..."

Customer :	CCB
Type :	6208 CR-D
Location :	Harbor of Brussels Belgium
Application :	Off-loading gravel and sand from barges
Mount :	Low portal gantry on crawlers
Lifting Capacity :	6.6 UStons/6 Mton
Reach :	68 ft / 20,8 m
Attachment :	Medium duty 3yd ³ /2.5 m ³ Grab
Power Source :	166-hp / 124 kW Caterpillar diesel engine
Productivity :	400 tons/hr.

Faced with increasing repair costs, poor reliability, and low productivity, the CCB Company needed a new way to handle material. Changes had to be made in a short period of time to stay operational and reduce costs.

Mr. Deceur, Project Manager for CCB, explained, *"We were looking for solutions and Indusign/ECI provided us with all the information we were looking for in a short period of time. Their professional approach during the proposal process convinced us that the E-Crane was the answer and could do much more than we originally had in mind !"*

The E-Crane not only offloads barges and feeds several hoppers, but the increased reach and stock-out capacity eliminates the need for additional hoppers and conveyor belts. This crane is mounted on a low portal on crawlers allowing the crane to work and maneuver in narrow spaces in the yard and along the dock.

The crane has been in service for 4 years. Mr. Deceur recently looked back on his decision and stated :*"The excellent reliability and performance of the E-Crane has helped us to reduce cost and increase the capacity of our terminal."*
