Extraordinary Products by Extra Ordinary People

“With the E-Crane® we are now saving up to 50% in time compared to the old situation.”

Customer	VAN HEYGHEN RECYCLING GROUP GALLOO
Type	21382 GA-E
Location	Port of Ghent, Belgium
Application	Loading Scrap into Handymax Vessels, Offloading Barges and Coasters, Stockpiling
Mount	High Portal on Rail Lower
Lifting Capacity	44 UStons / 40 Mtons
Reach	125 ft / 38,2 m
Attachment	15.7 yd ³ / 12 m ³ Orange Peel Grab
Power Source	800-hp / 600 kW Electric Motor

This is the third successful installation of an E-Crane® for Van Heyghen Recycling, part of the group Galloo. There are now seven E-Crane® balanced cranes operational at the different Galloo sites in Belgium and France.

The new 2000 Series E-Crane® has greatly reduced operating time and costs in loading Handymax vessels and in receiving, handling and stocking scrap in the yard. The E-Crane® is used for stockpiling the scrap to a height of over 25 meters, necessary to ensure there is enough scrap ready for the loading of Handymax ships. Since the arrival of the new E-Crane®, unloading barges with scrap for this stockpile takes less than half the time it did before! When loading smaller coasters, the measured loading rate surpasses 1.000 tph and with the help of this 2000 Series E-Crane®, the ocean going Handymax ships can now be loaded in under 48 hours.

Mr. R. Debaere, CEO at Group Galloo Recycling: *"It took some effort to convince the local management, that was renting mobile harbor cranes for many years, of the benefits of the E-Crane® solution. I promised them an improvement of 25% and I must admit that even I was pleasantly surprised to see that with the E-Crane® we are now saving up to 50% in time compared to the old situation with the rental cranes."*
