

TEN REASONS WHY E-CRANE® CAN DRAMATICALLY

CUT COAL HANDLING COSTS

1. TURNKEY TERMINAL SOLUTIONS ensure efficiency and productivity for every aspect of barge or ship unloading.

2. LONG OUTREACH AND DOWNREACH allow for unloading any type of barge or ship with minimum cleanup.

3. LOWER POWER CONSUMPTION by as much as 50% with flow-on-demand hydraulics and balanced boom design.

4. STATE-OF-THE-ART CONTROL SYSTEM builds operator confidence, reduces cycle times, and maximizes productivity.

5. PIT-STOP PREVENTIVE MAINTENANCE BY OPERATOR is fast, simple, and keeps the E-Crane going in continuous, cost effective "race car" operation.

6. SIMPLE, BALANCED DESIGN with fewer moving parts provides longer service life with greater availability and reliability for mission critical unloading.

7. FASTER TURNAROUND OF BARGES due to greater availability and operational efficiency.

8. CLAMSHELL DESIGN with powerful closing force gives bucket excellent penetration, affords maximum fill, eliminates spills and carryback.

9. MODULAR CONSTRUCTION enables custom solutions with off-the-shelf components.

10. SERVICE AND INSPECTION CONTRACTS cut costs and improve the life of your equipment.
