

700B SERIES

CUSTOMER: AMG RESOURCES

When AMG Resources installed a new 1100-ton Moros 1100 Shear, the team carefully evaluated several material handling options. After extensive research and site visits, the E-Crane quickly emerged as the clear choice.

AMG selected a 700B Series E-Crane, free-standing pedestal mount, with an 86-foot reach and a 1.68 yd³ grapple to handle a range of materials.

Positioned for maximum efficiency, the E-Crane's superior reach and excellent visibility allow the operator to feed and control the shear directly from the cab's ergonomic, climate-controlled environment. The electric-powered, stationary design eliminates the fuel and

Type:	EC4264 PD-E
Location:	Newark, NJ, USA
Application:	Feeding Shear
Mount:	Free standing 4-leg pedestal
Lift Capacity:	7.5 Mtons (8.3 UStons)
Duty Cycle Capacity:	6.2 Mtons (6.8 UStons)
Reach:	26.4m (86')
Attachment:	1.25 m ³ (1.63 yd ³)
Power Source:	132 kw (177 hp) Electric Motor

“The simplicity, efficiency, electric power, and low cost of operation made the E-Crane a no-brainer.”

maintenance costs associated with diesel machines, while freeing valuable yard space that would otherwise be used for mobile equipment travel lanes. After visiting other E-Crane

installations, they were impressed by its reliability and operational ease. “It’s truly a remarkable and highly regarded material handling solution that will serve our operation well into the future,” they affirm. The decision to partner with E-Crane, they add, “was the right choice.”
